DIFFERENT ENVIRONMENT. SAME IDEAL PROJECTOR.

An ideal projector for use in various environments, Epson's PU-series of projectors suit a wide variety of interchangeable lens, allowing projection on curved and corner spaces, along with the ability to project borderless multi-directional projections. The optional external filter increases the dust resistance to further minimise maintenance even in high dusty environments for a worry-free projection.

Multi-Directional Projections

Ideal for a wide range of applications including projecting onto ceilings and curved surfaces, the PU-series can be rotated 360° in any direction, be it horizontally, vertically or rotationally, without loss in image brightness, bringing forth a clear and crisp visual to your audience

Borderless Multi-Projection

With a wide variety of functions available for multi-projector installations, you can adjust the brightness, colour and position of overlapping areas for seamless, beautiful displays with the PU-series of projectors.

Powered Lens with Stepping Motor

The powered lens with stepping motor offer limitless possibilities in projector placement. Covering a wide range of angles, the motorised lens shift gives you a great deal of flexibility when installing the projector. The newly adopted stepping motor lets you make highly precise adjustments when employing edge blending, stacking and other techniques. Adjustments can also be made via remote control or over a network, enhancing usability even for ceiling-mounted projectors.

FUSS-FREE VERSATILITY.

Enjoy the ease of stackability with the PU-series' easy stacking build, using lesser equipment and shorter installation time to achieve your ideal projections. Gain more with in-built functions such as Geometry Correction Assist for Stacking and Tiling Function, Auto Colour Calibration and unleash an abundance of possibilities with the PU-series.

Easy Stacking Function

Stack easily with a remote controller from the OSD menu instead of the conventional PC, or wi-fi router, done quickly using the daisy chain by SDI signal IN/OUT support*1, reducing hassle and installation time. Alternatively, take advantage of the Auto Camera Assist for stacking to reduce installation time to a mere five minutes without additional fuss.

Auto Colour Calibration*

Detecting screens that became unevenly coloured over time, the camera allows the projector to automatically correct colour and detecting subtle colour inconsistencies between multiple projectors. You can program it to check colour manually or automatically at regular intervals to deliver stable image quality with minimum maintenance.

BETTER MANAGEMENT. WITHOUT HASSLE.

Hassle-free projector management and easier setup are made possible with Epson's suite of professional tools. Manage your fleet of projectors and handle mass kitting with the Epson Projector Config Tool, achieve seamless edge blending and more with Epson Projector Professional Tool, and stay in control remotely with the Epson Projector Management Software.

Epson Projector Config Tool for Easy Set Up

Using NFC wireless communications technology to change projector settings and check equipment information, the Epson Projector Config Tool is an app that allows you to configure network and projection settings in advance, even when the projector is switched off. Allowing management across your fleet of projectors, this tool helps to reduce time and effort required, increasing efficiency.

Epson Projector Professional Tool

Match projected images' borders to project a vivid and clear supersized image with the Epson Projector Professional Tool. With the tool, settings that previously required separate remote controller operations for each projector can also all be done on a single PC, greatly reducing installation time and effort.

Epson Projector Professional Tool

Reduce manpower needed by staying in control remotely with the Epson Projector Management Software. You can now check the status of all the projectors from one computer by connecting multiple Epson projectors to a network. The software also incorporates a message-broadcasting plug-in to send messages to Epson projectors over the network, and has the ability to power down all Epson projectors in the building after working hours
